"Glenn DuPont is a meticulous restorative dentist who excels in functional esthetics." – DR. PETE DAWSON

Diagnosis and Treatment Planning: *Still the Keys to Success*

A Step-By-Step Approach to Successful Case Outcomes

We all have experienced patients for whom we have no idea what to do or where to start. Or restorative work that did not turn out well.

In fact, treatment planning can sometimes keep a good dentist up at night. How can we make teeth look fantastic and last?

It is our responsibility to create the beautiful teeth that patients desire through a comprehensive plan that will generate predictable results and a healthy, maintainable dentition. As dental professionals we *must* continually seek improvement of our diagnostic and treatment planning skills to facilitate optimum dental health in our patients.

Drawing from over four decades of dental experience, Dr. Glenn DuPont shares a simple, systematic approach for evaluating patients and developing a comprehensive treatment plan and efficient treatment sequence. This systematic thought process can be applied to both simple and difficult restorative challenges to create long term stability with beautiful results. Apply this step-by-step approach to a wide range of cases. Discover the elements of communications with patients, specialists, and laboratory professionals which are equally critical to a successful outcome. Explore how to evaluate and communicate the position of the TMJs, the influence of the muscles, and the envelope of function and their interior relationship when restoring severe anterior wear problems. Dr. DuPont will also share approaches that are made possible with new materials and techniques.

Employ these keys to success in your own dental practice for predictable, beautiful results and to help patients achieve optimum dental health.

LEARNING OBJECTIVES:

- Understand that predictability in esthetics and function is the key to restorative success
- Discuss diagnosis, treatment planning, and communication concepts
- Pinpoint critical communication with the technician for enhancing predictability and saving time/money
- Recognize the key biologic and functional principles that - when violated - will lead to eventual failure
- Learn how anterior teeth fit in their functional matrix and consequences of changing their size/shape
- Explore new materials and techniques and their applications
- Learn a systematic approach to achieving predictable results that last!

SUGGESTED FORMAT:

Full or Partial Day; Lecture, Keynote

SUGGESTED ATTENDEE:

Dentists, Lab Technicians

How do we measure true success in dentistry? Helping every patient realize a healthy, beautiful, maintainable dentition. To achieve this result, dental professionals must continue to improve their diagnostic and treatment planning skills. Dr. Glenn DuPont's speaking and consulting programs share a comprehensive, systematic approach for predictably creating long-term stability and the beautiful results patients desire.

Following graduation from Emory University's College of Dentistry, Dr. DuPont joined the practice of Drs. Peter Dawson and Pete Roach over four decades ago. He was hired to assist in the practice lab. His natural talent for sculpting was quickly recognized by Dr. Peter Dawson – a world-renowned educator and innovator in restorative dentistry. Dr. Dawson invited Dr. DuPont to work by his side and learn his approach and overall philosophy of finding conservative solutions to help patients save their teeth for a lifetime.

Dr. DuPont is a partner in the practice of DuPont & Wilkerson Dentistry with fellow senior faculty member Dr. DeWitt Wilkerson. Dr. DuPont has spent his career solving serious and extensive esthetic and functional dental problems for a growing number of grateful patients. The time-tested principles that he learned early, applied and improved upon, have served him well in his approach to solving severe esthetic and functional problems. Dr. DuPont's passion for developing comprehensive treatment plans, his delivery of compassionate patient care and his dedication to both esthetic and functional excellence have resulted in many hundreds of success stories.

Dr. DuPont's numerous professional and academic affiliations include serving as an Affiliated Clinical Associate Professor at the University of Florida's College of Dentistry. He is the Past President of the American Academy of Restorative Dentistry, the Florida Academy of Dental Practice Administration, and the Pinellas County Dental Association. He has taught at the L.D. Pankey Institute for many years. Dr. DuPont was honored by his peers as a Fellow in the American College of Dentists.

Dr. DuPont is a founding member and senior faculty member of the Center for Advanced Dental Studies – now called the Dawson Academy. For more than four decades, Dr. DuPont taught The Dawson Academy's curriculum to thousands of dentists around the world (through 2021.) Additionally, Dr. DuPont has lectured internationally on techniques and creative approaches to solving difficult dental problems for patient. He is passionate about sharing his extensive experience and knowledge with fellow dental professionals.

AFFILIATIONS/MEMBERSHIPS

The Dawson Academy – Founding Member and Past Teaching Faculty
American Academy of Restorative Dentistry – Past President
American Equilibration Society – Program Chairman 1992 Annual Meeting
American Dental Association
Florida Dental Association
Pinellas County Dental Association – Past President
West Coast Dental Association
Florida Academy of Dental Practice Administration – Past President
Prosthodontic Study Group – Founder and President
Associate Faculty – L.D. Pankey Institute 1985-1995; 2021+
Adjunct Faculty – University of Florida Dental School

PRESENTATIONS (Partial Listing)

ADA Annual Sessions
Hinman Dental Meeting
Greater New York Dental Meeting
Yankee Dental Congress
Chicago Midwinter Dental Meeting
Florida Dental Conference
California Dental Association
Star of the North Dental Meeting
American Academy of Restorative Dentistry
American Prosthodontic Society
American Equilibration Society
Southwest Prosthodontic Society
